The fire District also participated in shop with a cop. The fire engine is due to be replaced in 2023 with the normal rotations. The district sets aside money to pay cash for a new engine, the presumption was that the engine would cost \$750,000. The committee was notified this past week to replace the engine in 2021 it will cost \$940,000 and to expect an 8% increase in 2022.

K. Police Commission Report- Did not meet

L. Energy Independence Team Report-Did not meet

M. Board of Appeals Report-Did not meet

8. Unfinished Business

A. Brooks made a motion, seconded by Duggan to approve Ordinance #2021-11 Stop Sign Ordinance Amendment. Motion passed 7-0.

9. **Communications and Recommendations of the Administrator**-Sergeant reported he received an email regarding the grant for the downtown lights. They are not accepting the expenses before the expenses were incurred before the grant was approved. Sergeant reached out to the Mayfield disaster response team to see if they needed any lineman or public works staff sent down to help. The City of Edgerton reached out and stated they are applying for an Energy Grant and has asked Evansville and Milton to partner with them. Edgerton would be the applicant, recipient and manager and Evansville would be supports of that grant. Sergeant also reported there were a couple hundred comments that came in for the Westside Park Improvement Project. About half of the comments were directly related to athletic field arrangements, of that half about 75% were directly related to soccer. MSA has two concept plans; one is similar to what was originally shown with the referendum which is not feasible due to storm water runoff and elevation changes. The second concept is based on what's feasible to accommodate the stormwater and elevation changes as well as our needs and wants for the park.

APPLICATION FOR PRELIMINARY AND FINAL LAND DIVISION – STAFF REPORT

Application No.: RZ-2021-08 Applicant: Dora/Harlin Miller

Parcel 6-27-965

January 6, 2022

Prepared by: Colette Spranger, Community Development Director

Direct questions and comments to: colette.spranger@ci.evansville.wi.gov or 608-882-2263

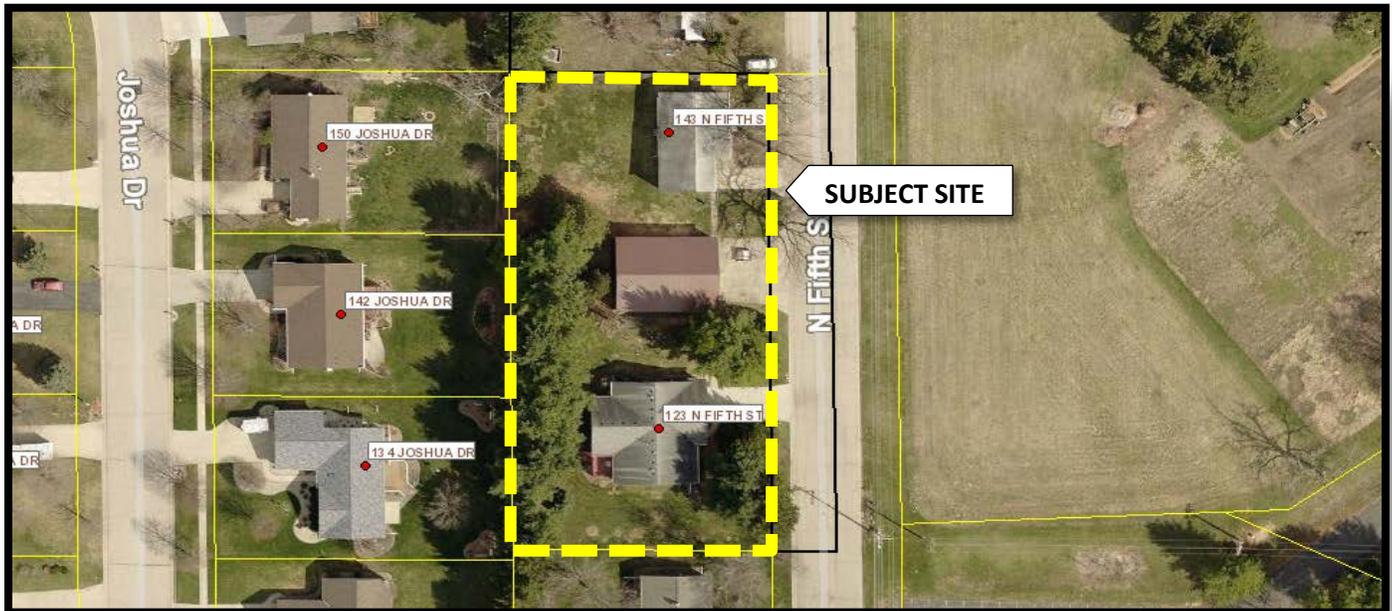

Figure 1 Approximate Location Map

Description of request: An application to divide an existing residential lot, parcel 6-27-965, into two residential lots through a Certified Survey Map, has been submitted for consideration by the Municipal Service Committee and the Plan Commission.

Existing and Proposed Uses: The existing 0.8 acre parcel is developed with two separate dwelling units and two accessory buildings. The CSM will divide the parcel into two lots. The northernmost lot is proposed to be 9,938 square feet (0.23 acres) and will include the dwelling unit with the address of 143 N. Fifth Street. The second lot will contain the remaining 24,844 square feet (0.57 acres) and will include both accessory buildings and the dwelling unit addressed at 123 N. Fifth Street. The newly created parcels will retain R-1 zoning.

Consistency with the City of Evansville Comprehensive Plan and Municipal Code: The proposed land division and land uses are thoroughly consistent with the Future Land Use Map of the Comprehensive Plan. The proposal complies with the design standards and environmental considerations as set forth in the Land Division Ordinance.

Staff has requested the applicant fill out and submit an annexation application in order for the portion of Fifth Street in front of the property to come into the City. Currently the western half of Fifth Street in front of parcel 6-27-965 is under the jurisdiction of the Town of Union.

At present, there are no sidewalks along this stretch of Fifth Street, which begins at Garfield Avenue. This type of land division would trigger the City enforcing its sidewalk standards as the area is brought into compliance.

Discussion at both the Municipal Services Committee and the Plan Commission recommended that this application be approved by Common Council, being subject to three conditions:

- a. The final CSM is recorded with Rock County Register of Deeds.
- b. The applicant files an annexation application to bring the portion of Fifth Street directly abutting the proposed parcels under the jurisdiction of the City of Evansville.
- c. The City may require the applicant to install a sidewalk, giving 24 months advanced notice.

Plan Commission Recommended Motion: *Motion for Common Council approval of certified survey map to divide parcel 6-27-635 into two lots located at 123 N. Fifth Street, finding that the application is in the public interest and meets the objectives contained within Section 110-102(g) of city ordinances, with the condition the final CSM is recorded with Rock County Register of Deeds, sidewalks may be required by the City within 24 months notice from the City, and that the applicant file an annexation request for that portion of Fifth Street adjacent to the property to be brought into the City.*

Public Participation Plan for the City of Evansville 2022 Smart Growth Comprehensive Plan Update

What is a Public Participation Plan?

The City of Evansville Smart Growth Comprehensive Plan is a legal document that guides the future development and policies of the City of Evansville. Public participation is an important part of the planning process, allowing residents to voice their desires and concerns with the many aspects of their city. This public participation plan is designed to meet the public participation requirements of Wisconsin's "Smart Growth" Law (Wis. Stat. § 66.1001(4)(a)).

The public participation plan for the City of Evansville Smart Growth Comprehensive Plan is intended to serve two purposes. First, it will help answer the most basic planning questions, such as "What do the residents, business owners, and industries of the City of Evansville want their city to look like?" An important and effective way to identify public values within the city is to provide opportunities for public involvement throughout the planning process.

Second, this public participation plan is intended to engage those within the City of Evansville in shaping the future of development and city services. Active participation in the planning process allows you to help shape the community you live in for years to come. This plan is intended to engage Evansville residents, business owners, and industries. It is important to have meaningful participation to create a plan that is for the people of Evansville. The results of participation activities will be documented and included in the final version of the Evansville Smart Growth Plan.

How to Participate

- Planning Materials at Evansville City Hall at 31 South Madison St

Public Involvement Opportunities

Citywide Public Input Survey – Winter/Spring 2022

A public input survey will be made available in January 2022. The results of this survey will be used to guide the planning process. The survey results will be presented at the March XX Plan Commission meeting.

Business Survey – Winter/Spring 2022

This will be a survey provided to business owners in the City of Evansville, asking general questions about the city, economic development and the business climate. This survey will be used to guide the planning process, especially the economic development chapter.

Public Informational Meeting & Public Hearing – Tentatively June/July 2022

This will be an opportunity for the public to view and comment on a draft version City of Evansville Smart Growth Comprehensive Plan before its final approval in August of 2022. This is an important opportunity for any final input or changes before the plan is officially adopted into law.

Plan Commission Meetings – Monthly

The monthly Plan Commission Meetings will be where much of the discussion between decision makers and city staff takes place. These public meetings provide an opportunity for the public to weigh in on items being considered by the Plan Commission and offer input to Plan Commissioners about the City of Evansville. Each month the Plan Commission and city staff will have discussions about the Smart Growth Plan update.

City of Evansville Website Updates – Ongoing

The website will be updated as the planning process progresses. Public can use the website to stay in touch with the planning process.

Public Comments – Ongoing

Public comments regarding the City of Evansville Smart Growth Comprehensive Plan will be accepted throughout the planning process by e-mail and standard mail. Send comments to smartgrowth@ci.evansville.wi.gov or use the contact information below if you'd like to use standard mail or would like to ask questions or request more information about the Smart Growth Plan.

Adopted by the Plan Commission at its regular meeting on January 4th, 2022.

Staff Memo

To: Common Council
 From: City Clerk's Office

RE: Mobile Vendors and Solicitors

Overall Highlights:

- Both license will expire on December 31st
- Added Police Chief & City Clerk to the definitions to read "Police Chief or Chief of Police means the City Police Chief and/or designated representative City Clerk or Clerk means the City Clerk and/or designated representative." So that others such as the Lieutenant or Deputy Clerk are able to take care of these in case of someone's absence.

Mobile Vendor

- Mobile Business no longer require a peddler's permit but there will still need to be a background check ran.
- Added that we need a copy of WI Sellers Permit
- These were previously issued by the Zoning Administrator but will now be handled primarily by the Clerks' office but will be reviewed by the Police Chief & Zoning Administrator.
- Change the fee for a Mobile Vendor from \$300 to \$150.

Peddler's License

- Change the name from Peddler's, Canvasser, Transient Merchant's or Transient Photographer's License to "Solicitor" so it's all encompassing
- Increase the Solicitor's license fee from \$75 to \$100. This is to cover the cost of review by the Clerk's office, Police Dept., background check and license printing fees. The last increase for this license was in 2009.
- Solicitor's License now require 2- 2x2 photos to be included with the application; one to be attached to the license and one to be kept in the file. (Sec 90-4(10))
- Outline what may constitute as a non-recommend (Sec 90-5(c)(2))
- Restrict times that they can't solicit- no soliciting between 8pm-9am (Sec 90-9(a)(3))
- Made sure to note that a license is not needed for city, county or state employees on official business or candidates for local political elections (Sec 90-3(1))
- For Reprints there will be a \$5 fee and they must submit 2 additional 2x2 photos.
- Added a revocation section which includes making any fraudulent, false, deceptive or misleading statement or representation in the course of engaging in direct sales.

Your feedback is greatly appreciated.

Thank you,
 Darnisha Haley

RE: Letter of Commitment for Energy Planning Grant

Ramona,

The City of Evansville is excited to partner with and support Edgerton's application. Evansville confirms the city's intention to participate in Edgerton's proposed project: *North Rock County Comprehensive Energy Plan Collaboration*. We are committed to supplying available staff, time and resources defined in the proposal as a partner on the project team.

Evansville recently passed a resolution committing to Carbon Neutrality and has worked to add energy efficiency, sustainability, and carbon neutrality projects over the last few years. Including a wind turbine to generate electricity, electric and hybrid equipment purchases, conversion of street lights to LED, and partnerships with WPPI to bring energy efficiency initiatives to business and residents.

The grant will allow Evansville to continue and grow the work the city has done so far. The energy plan created with the grant will be incorporated into the City's 2022 update to the Comprehensive Plan.

We are committed to providing in-kind staff labor in the amount of \$4,800 as shown in the project budget. We look forward to assisting you in this project to develop baseline energy profiles and an actionable list of energy efficiency opportunities when the project moves forward.

Sincerely,

Re: Classification and Compensation Study

Dear Mr. Sergeant:

Baker Tilly Incorporated is pleased to provide the City of Evansville with the City's completed Classification and Compensation Study. The study provides an overview of the City's current classification and compensation system as it relates to all of the City's positions and our final report including the methodology used to update the classification and compensation system, options for implementing the compensation system and for addressing issues related to salary compression, and other compensation pay issues.

The study represents a thorough and comprehensive review of the City's compensation system. The recommendations offered, we believe, will increase the market competitiveness of the City's compensation program within the regional marketplace and provide increased internal equity among City positions. Implementation of these recommendations will assist the City in attracting new employees, when necessary, and in retaining current employees needed to meet the City's service demands.

Baker Tilly expresses its thanks to the City staff who completed Baker Tilly's Position Analysis Questionnaires as we worked to verify their current job responsibilities and requirements. We particularly want to thank the members of the City's staff who supplied us with data and answered numerous questions, direction and feedback throughout the study. Baker Tilly appreciates the privilege of serving the City and hope that we may be of assistance to you in the future.

Very truly yours,

BAKER TILLY VIRCHOW KRAUSE, LLP

1. Executive Summary

Baker Tilly Incorporated completed a Classification and Compensation Study for the City of Evansville, Wisconsin in the fall of 2021. The study represents a comprehensive review of the components that affect an organization's compensation program – current compensation structure, the City's compensation philosophy, regional market competitiveness of City salaries, the internal equity of salaries paid to comparable City positions and ongoing maintenance and administration of the compensation system.

The City has encountered some situations that could be addressed by conducting a comprehensive classification and compensation study and implementing an up to date compensation system. Difficulty in recruiting and hiring new employees, candidate pools lacking the skill sets required for the position being recruited, and employee turnover in certain positions are all indications that the City's classification and compensation program may not be competitive within the regional market.

A classification and compensation system provides the framework for determining how employees will be paid. As a general rule, most organizations conduct comprehensive classification and compensation studies every five to seven years ensuring their ability to hire and retain qualified employees and maintain equitable internal relationships. The external market focus is important because it ensures that the compensation plan is adequate to attract new employees and retain existing employees. If compensation levels fall below those in the regional marketplace, the organization may experience difficulty hiring people and increased employee turnover as employees seek jobs with other organizations that will pay the market rates for their skills and abilities. In today's economy, it is imperative to remain competitive and, in order to do so, it is necessary to monitor the regional marketplace. An organization must ensure market adjustments are provided to the salary scale to maintain their competitive position when resources are available. When a position is recruited several times due to a lack of qualified applicant pools willing to work at an advertised salary, this leads to smaller and smaller pools and breaks in service with responsibilities for the vacant position being assigned to other full-time staff.

Organizations should expect some employee turnover, but when it becomes excessive, turnover has a serious impact on the organization's overall effectiveness. Advertising costs are a measurable component of turnover, and as the City moves through the selection process, the time spent by current employees covering the void left by the departing employee often diverts their attention from their day to day responsibilities creating overtime demands and often frustration on the part of the remaining employees as they attempt to meet deadlines and maintain acceptable levels of service. These are some of the hidden and non-quantifiable costs associated with turnover. There is also a substantial cost for turnover that comes with training of new employees. Employees receive on-the-job training which diverts the attention of other employees away from their regular duties to assist in training. This is particularly true in the public safety area where significant State mandated training is required before a provider can serve effectively and to ensure quality services are provided to the citizens and visitors of the community.

1. Executive Summary

Organizational effectiveness is affected as current employees train new employees and as those new employees endeavor to become proficient in their job. While these costs are not necessarily visible in expenditure reports, they will be demonstrated in performance data in the form of reduced service outcomes.

As the City continues to experience change, it will also be important to offer competitive salaries to attract the best staff possible to serve the citizens of the City of Evansville. Competition for a wide range of professions in the local government marketplace is becoming more intense each year as the private sector continues to attract workers to higher paying jobs, local government curriculums are decreased at the college level, benefit levels drop for local government employees, and other competing organizations increase their salaries to remain competitive and to meet demands for service in their communities and organizations.

The periodic review, which comes with completion of a comprehensive classification and compensation update, also enables an organization to account for changes in use of technology, changes in work processes, tools and equipment, and other factors that can affect job responsibilities. In today's fast paced world of technological change, this is especially important as almost every governmental process is affected by advancements in technology and, as this occurs, employee's skills, knowledge, and abilities, as well as their proficiency in the use of required tools and equipment, changes. Changes in job requirements, such as addition of new programs or assumption of duties for a vacated position, sometimes results in a new pay grade assignment. In order to properly maintain the compensation system, an ongoing process is needed to review job responsibilities and job class assignment to pay grades to ensure jobs are properly compensated.

The primary purposes of the study that were identified by the City included:

- To attract and retain qualified workers;
- To provide equitable and competitive salaries for all workers of the City;
- Develop a salary structure that provides for internal equity and ensures external competitiveness with other municipalities in the City's geographic area; and
- Review current compensation practices and policies and develop recommendations for ongoing administration and maintenance of the proposed Classification and Compensation Plan.

The following study documents the review and evaluation of the City's existing compensation system and the methodology used to develop more competitive compensation levels. The study was conducted with extensive participation City management staff and input from department heads and employees.

A comprehensive compensation survey was developed and wage data was collected from comparable regional employers. The results of the job evaluation and the salary survey data were used to create a salary curve, which served as the foundation for creating a revised compensation program. The compensation program structure relied upon a review of compensation philosophy concepts that included:

- Providing fair and equitable compensation to employees in a competitive and changing labor market
- Maintaining a competitive pay structure that takes into consideration the City's fiscal resources
- Ensuring that employee compensation reflects changing economic conditions
- Providing consistent administration of pay policies and procedures among all City departments

1. Executive Summary

Major findings of the study can be summarized as follows:

- Thirty-three City positions were included in the survey. We were able to use the information for twenty-eight City positions in the analysis of the data, five positions were excluded from the overall analysis as the data was either incomplete (not enough information received) or inconsistent (responses not consistent with the position in the City of Evansville). The majority of City positions do not have established salary ranges just a current wage for the incumbent(s) in each position. We included in the analysis a comparison of how the City's current wages compared to the established minimum, midpoint and maximum wage rates per position with the survey respondents. Based on the analysis of the data, on average the City's current salaries are, on average, 4.55% above the average minimum salaries; 5.10% below average market midpoint salaries and on average, 13.97% below the average maximums reported by the survey participants. For comparison purposes, wages which are within 5% above or below the market average, dependent on the organizations pay philosophy regarding market relationship, are considered to be competitive.
- Internal pay relationship inequities exist within the City. This occurs in all organizations as position responsibilities change over time and compensation levels don't always keep up with those changes. Positions that require similar minimum qualifications and have comparable responsibilities should be compensated at comparable levels. We reviewed all positions and then evaluated each position against standard criteria. Each position was then assigned to a pay grade that reflected its internal relationship to other City positions thereby ensuring equitable internal pay relationships.
- The study offers a recommended compensation plan and recognizes an implementation schedule that would be effective upon Common Council adoption. The implementation schedule provides a strategy that ensures that all employees are paid at least at the minimum of their assigned pay grade.

2. Introduction

The City of Evansville, Wisconsin retained Baker Tilly Incorporated to conduct a Classification and Compensation study in the fall of 2020. Completion of this study reflects a significant effort by City staff to provide polices and human resources related data, complete questionnaires and review information.

A comprehensive salary survey was conducted as part of this study with the City reviewing and approving the proposed jurisdictions to be surveyed. Survey recipients were selected based on demographics, comparable levels of services provided by the entity surveyed, geographic proximity to the City of Evansville and competition for employees. Twenty-one (21) communities listed below, were invited to participate in the survey. It was difficult to collect the information and Baker Tilly staff as well as City staff made multiple contacts to obtain survey information. We were able to collect information from the entities in bold, with 14 total responses:

- **City of Brodhead**
- City of Columbus
- City of Dodgeville
- **City of Edgerton**
- City of Elkhorn
- City of Jefferson
- **City of Lake Mills**
- **City of Lodi**
- **City of Marshall**
- **City of McFarland**
- **City of Milton**
- City of Mineral Point
- **City of Waterloo**
- Village of Cottage Grove
- **Village of Cross Plains**
- **Village of East Troy**
- **Village of Johnson Creek**
- **Village of Mount Horeb**
- Village of Prairie du Sac
- **Village of Sauk City**
- **Village of Waterford**

Survey respondents were asked to provide information on only those benchmark positions which they considered to be comparable to positions in their organizations. Therefore, survey respondents did not provide data for every position surveyed.

3. Methodology

Baker Tilly Incorporated used the following methodology to develop a new and revised classification system and compensation program for The City of Evansville:

1. Baker Tilly staff met with the Mayor, Treasurer and Executive Assistant to establish a working relationship, review current policies and practices relating to the City's existing pay practices, and to collect data on organizational structure, operations, and staffing in addition to identifying any specific departmental needs and concerns related to this study. This meeting also provided an opportunity to discuss the City's goals in conducting this study.
2. The City provided copies of existing job descriptions, the City's current pay scale and compensation policies.
3. A meeting was also conducted with all department heads to discuss the project , their responsibilities during the project, answer questions and discuss the questionnaire to be completed by all department heads to collect information on department structure, operations, and staffing, along with identifying any specific departmental needs and concerns related to this study.
4. An employee orientation session was conducted by Baker Tilly to introduce the study, explain the study process and to answer questions. This meeting also provided an opportunity for employees to voice concerns and have input into the study.
5. At this meeting Baker Tilly provided information on completing a Position Analysis Questionnaire (PAQ). Employees were encouraged to participate in the study by using the PAQ to respond to questions regarding job responsibilities, job requirements and characteristics applicable to each position. Each employee's supervisor then reviewed the completed questionnaires for completeness and accuracy and provided any additional information they felt was relevant to the position.
6. The Baker Tilly consultant team reviewed the PAQs completed by City employees upon their receipt and made preliminary classification decisions.
7. Baker Tilly conducted a comprehensive market survey that requested information from twenty-one (21) organizations identified in consultation with the City to determine the market for benchmarked positions. Salary data for benchmarked positions were solicited. Information was gathered on minimum, maximum, and actual salaries for all positions surveyed.
8. All City positions were evaluated using Baker Tilly's Systematic Analysis and Factor Evaluation (SAFE®) system to assist in assuring that the internal relationships of positions within the City were equitable. The evaluation ensured

3. Methodology

each position was assigned to the appropriate salary grade in the proposed compensation plan.

9. Utilizing the salary data supplied by comparable organizations and the SAFE job evaluations factors for each position a compensation plan was developed, positions were assigned to the pay plan and implementation options were developed.
10. Guidelines for implementation and ongoing administration of the compensation program were developed. These guidelines provide for annual adjustments to the salary schedule ensuring that the City's pay scales stay current with changing economic and market conditions. The implementation options and the estimated costs are provided as part of this study.

4. Findings and recommendations

Developing a classification system and compensation program involves the analysis of substantial quantities of data collected from employees, supervisors, comparable employers, and the City. We have evaluated the City's existing compensation program based on our analysis of the study data and the survey results. Using this information, we have developed a compensation program for the City of Evansville, which is described below. Options for implementing the recommended changes conclude this section.

A. Evaluation of the current compensation program

Discussions with City personnel and review of compensation data indicate that some employees of the City may be under-compensated in relation to other comparable regional organizations when comparing actual salaries. Other findings discussed earlier in the study indicate a wage problem demonstrated by:

- Difficulty recruiting employees in various positions
- Concerns about possible employee turnover because employees may leave to take higher paying jobs with other employers
- Positions with comparable responsibilities requiring comparable education and experience that are assigned to different pay grades resulting in pay differences

B. Compensation philosophy

A compensation philosophy guides the design of a pay plan and answers key questions regarding pay strategy. It generally takes a comprehensive, long term focus and explains the compensation program's goals and how the program supports the employer's long-range strategic goals. Without a compensation philosophy, compensation decisions tend to be viewed from a short-term standpoint apart from the organization's overall goals.

In addition, movement of positions through the pay grades is an important topic for consideration of local governments. An organization's desired market position involves defining the market and identifying where the organization wants to be positioned within that market. Market position should balance what it takes to attract new employees and to retain skilled employees (in other words, eliminating higher pay as the reason employees leave the organization) with the organization's financial resources. Internal equity expresses an organization's desire to provide comparable pay to positions with comparable duties and responsibilities.

Movement of positions through the assigned salary grade is also an important consideration for employees and their supervisors to understand. Employees should have an understanding of how they may obtain pay increases whether it is by merit or some other form, so that they believe that they have a future in the community that they serve.

In consultation with the City's Management, Baker Tilly staff developed a compensation philosophy framework guiding the compensation program development and the direction of this study. As part of this study, we recommend that the City consider these concepts in the adoption of a formal compensation philosophy:

- Providing fair and equitable rates of pay to employees
- Developing a system of pay grades that state the minimum and maximum rates that the City will pay individuals within a job class and identify the midpoint of the range as the "market" rate
- Defining the City's market area based on the nature of the job class requirements and the availability of potential candidates locally or state-wide
- Establishing rates of pay that allow the City to compete successfully for new employees within its market area
- Establishing a market position that is fiscally responsible with public resources
- Ensuring that pay rates for employees reflect changing economic conditions
- Developing pay administration policies and procedures that ensure their consistent application between departments
- Ensuring that the compensation program is understandable to employees, the City Administrator, Common Council, and the public

C. Evaluating positions and developing a salary schedule

City employees completed individual Position Analysis Questionnaires (PAQs). Supervisors reviewed the PAQs and provided information for each position. Employees and supervisors both responded to questions regarding job requirements, factors which apply to their position, working conditions and the physical requirements of each job in compliance with the Americans with Disabilities Act (ADA). Based on the information provided in the PAQs and the City's updated job descriptions, Baker Tilly's SAFE® job evaluation system was utilized to evaluate, rate and rank each position in the City's workforce to establish preliminary class assignments. The factors considered in determining the relative value of positions are:

- Training and Ability
- Level of Work
- Physical Demands
- Independence of Actions
- Supervision Exercised
- Experience Required
- Human Relations Skills
- Working Conditions/Hazards
- Impact on End Results

The process of developing a salary schedule draws substantially from market data obtained in a compensation and benefits survey. This data is obtained by conducting a comprehensive survey of other comparable employers within the City's defined market area; that is, who does the locality compete with for employees when vacancies occur? Respondents are asked to provide information about the structure of their pay plans and the minimum, maximum, and actual salary rates of their corresponding benchmark positions, hours worked, number of employees, and information on additional compensation.

The proposed compensation program for the City has three pay scales, one for general government and public safety positions, one for library positions and one for the electric utility positions. The proposed compensation plans have 20 pay grades with a 6% spread between grades (it should be noted that not all grades are currently utilized in each plan). The compensation plan is designed as an open range system with an identified minimum, midpoint and maximum. Each grade in the pay plan has 9 steps with 2.75% between steps. The difference between plans is the starting midpoint which is based on the market comparison for each group. The updated compensation plans can be found in Appendix II of this report.

Each position was then assigned to the appropriate salary grade in the appropriate salary schedule based on the job evaluation points of the position (internal equity). The List of Positions and Assignment to Salary Grades is shown in Appendix II.

It is recommended that as part of this compensation plan, individual employee movement within the range incorporate individual employee performance. Employees should only receive wage increases if their performance is satisfactory or better.

5. Implementation

Implementation of the proposed compensation plans is effective at a time to be determined by the City Administrator and the Common Council.

Compensation Plan Implementation

The total costs of all options include moving employees below the minimum to the minimum. These costs are for wages only. The implementation options **do not** include employees in the police positions covered by the union contract, however the positions are included in the title and grade listing to indicate where these positions would fall if they were included in the proposed pay plan.

Option 1. This option moves employees who have a current wage below the minimum to the minimum of the range.

General Government and Public Safety Positions. Of the City's 27 employees in this group, 4 have a current wage which falls below the proposed minimum of the range. The annual cost to move these 4 employees to the minimum is \$14,767.39.

	# of Staff	Current Salary	Proposed Salary	Difference	% Increase
Totals	27	\$ 1,524,573.83	\$ 1,539,341.22	\$ 14,767.39	0.97%

The total cost for Option 1 is \$27,304.62

Option 2. This option provides adjustments for employees whose current wage falls within the range to which their positions has been assigned. Employees are moved to the step closest to their current wage which provides an increase to the employee.

General Government and Public Safety Positions. This option impacts twenty-one of the twenty-seven employees in this group. The cost to move these employees onto a step in the proposed pay scale is \$22,791.16. The total cost of moving these employees as well as the four employees below the minimum onto the pay scale is \$37,558.54. Two employees in this group have a current wage which falls slightly above the maximum wage for the grade assigned to the position.

6. Implementation

The total annual cost for Option 2 is \$55,364.32.

Option 3. This option moves employees into the proposed wage schedule based on years of service. Employees would move to a step based on their years of service in their current position.

General Government and Public Safety Positions. The annual cost to move the 25 employees in this group with a wage which falls below or within the proposed pay range is \$75,052.49.

	# of Staff	Current Salary	Proposed Salary	Difference	% Increase
Totals	27	\$ 1,524,573.83	\$ 1,599,626.32	\$ 75,052.49	4.92%

The total annual cost for Option 3 is \$103,883.70.

Ongoing Administration

After initial implementation is achieved, the City should develop administrative procedures that provide for annual market analyses and salary adjustments based on market and economic conditions and the City's ability to pay. It should be recognized that as the market shifts, employee's base salaries should shift with adjustments in the City's compensation schedule to maintain market competitiveness.

Base adjustments. It will be necessary for the City to adjust the salary schedule and grades based on market adjustments and other factors such as recruitment and retention. The City can establish a guideline for determining annual base adjustments. For example, the City could base its adjustment on the Consumer Price Index (CPI). The City should also contact comparable jurisdictions to find out what percentage adjustment they are making to their pay scales as a second level of verification of the pay range

adjustment. This would also ensure that the City maintains marketability among comparable regional organizations.

If the CPI, for example, is 2.5, a 2.5% increase would be applied to the wage rates of each pay grade. In addition, all employees with performance that meets or exceeds job expectations would receive the 2.5% increase applied to their base salary. In addition employees would move to the next step in which their position has been assigned, either on the first of the year or on anniversary date dependent on the policy of the City. By making this base adjustment to all employee salaries, the City ensures that employees will not fall behind the market.

Recommendations

The City of Evansville is a service-oriented organization. The City delivers services through its employees who are a major investment in the organization's infrastructure. The report that precedes these recommendations contains significant amounts of information, which has been gathered from a variety of sources, carefully and objectively analyzed, and structured in a way that will provide a sound and fair system of compensating employees if followed carefully. It is our independent judgment that has resulted in the following recommendations.

We urge the City to:

1. Approve the proposed salary schedule provided in Appendix III of this report. Adoption of the revised salary schedule, developed utilizing market data, will result in an up to date compensation schedule which will better equip the City to recruit for vacant positions, retain existing employees, and provide for flexibility in hiring, promotions and annual increases.
2. Approve the recommended position assignments provided in Appendix IV, which assigns positions to the proposed salary grades. The schematics developed, utilizing objective analysis of data, will allow for establishment of internal equity among the various positions of the City.
3. Approve an Implementation Option which meets the goals of the City and falls within the financial resources available to the City. Adoption of one of the recommendations will establish more equitable compensation levels for all employees, address compressions issues, and bring those employees that are below the market up to market standards. Baker Tilly recommends adoption of Option 2 to ensure market competitiveness of employee salaries.
4. Provide support for ongoing administration of the program via a system of market adjustments.

Appendix I: Glossary

Annual Salary Adjustment – A salary increase based on changes in a price index, such as the Consumer Price Index (CPI), designed to help salaries keep pace with market changes. Other factors may be considered in annual salary adjustments, including the anticipated increases in the salary schedules of comparable employers. The adjustments are applied to the minimum, midpoint, and maximum rate of each pay grade and to employee salaries so their position within their assigned pay grades is maintained.

Benchmark Jobs – A group of jobs used as reference points for making pay comparisons with other organizations.

Class Description – A summary of the essential duties performed within a job class and examples of the specific tasks and employee knowledge, skill and abilities required to perform the job.

Classification – The assignment of positions to appropriate positions and pay grades based on the results of a job evaluation.

Internal Equity – Fair and consistent pay relationships among jobs or skill levels within a single organization that establishes equal or comparable pay for jobs involving comparable work and utilization of comparable skills.

Job Class – A grouping of jobs that is considered to be substantially similar for pay purposes.

Job Evaluation – A systematic procedure designed to make classification decisions by applying standard criteria to a review of all positions.

Line of Best Fit – In regression analysis, the line fitted to a scatter plot of coordinates measuring pay and job evaluation factors. The line is used to develop the salary structure.

Occupational Group – Jobs involving work of the same nature but requiring different skill and responsibility levels.

Pay Grade – A level within a salary schedule into which positions with similar job evaluation factors are placed for compensation purposes. Pay grades have a minimum rate, a midpoint rate, and a maximum rate and define what an employer is willing to pay for a particular job. The midpoint of the pay grades approximates the market salary rate which would be paid for satisfactory performance.

Compensation Philosophy – Decisions about employee compensation that address the relative importance of internal equity, external competitiveness, employee contributions or performance, and administration of the pay system.

Performance Evaluation – The process of determining the extent to which a worker's assigned task outcomes meet employer performance expectations and performance standards.

Position Analysis Questionnaire (PAQ) – A structured job analysis technique that classifies job information based on such factors as information input, mental processes, work output, relationships with other persons, job context, and other job characteristics. The PAQ analyzes jobs in terms of worker-oriented data.

Progression through Pay Grades – Strategies that move employees through the pay grade.

Salary Survey – The systematic process of collecting information and making judgments about the compensation paid by other comparable employers. Salary data are useful in designing pay grades and salary structures.

Evansville West Side Park and Leonard-Leota Park Improvements

Summary of Public Comment | November 17, 2021

Summary of Public Comment

Preliminary Concepts

MSA Presented the Preliminary Concepts at a Public Open House on October 28, 2021 and Attended the Jack-O-Lantern Jamboree held on November 6, 2021 at J.C. McKenna Middle School.

Public comments were collected on the City's website as well as via hard copy during the events as well as City Hall. Comments were accepted through November 14, 2021. A total of 182 comments were received – via the Survey Form or direct emails.

Themes:

- Preferred Concepts:
 - West Side Park – Option “A” –
 - Aquatic Center – Option “3”
 - Leonard-Leota Splash Pad – no clear choice
- Comments (159) –
 - 81 related to Soccer
 - 21 Ballfields
 - 21 Aquatics
- Review of comments appears to show preference for West Side Park Option “A” to be related to arrangement of athletic fields and ballfields and location of aquatic center.
- There was no clear preference for the alignment of the road through from 7th to Wyler or Windmill Ridge.
- Loss of 2-3 Soccer Fields is detrimental to soccer program in Evansville.
- Design of roads and parking got mostly positive reviews when mentioned in comments, some concerns expressed by neighbors of the park regarding traffic and lighting, during events.
- Future project communication should discuss accessibility, general character of park(s), landscaping.
- Trails and Open Space should be key to West Side Park Plan.
- Concerns expressed about budget and maintenance of an aquatic center and splash pad.

Summary of Comments for West Side Park “A”:

- Prefer soccer fields behind houses.
- No overlap of Athletic Fields and ballfields (at least 10 mentions).
- Grouping of Ballfield backstops.
- Number of ballfields - (although a null comment since all three concepts had three).
- Connection through to Wyler/Windmill.
- (11 of 81 with Comments for Soccer Liked Concept A).

Summary of Comments for Aquatic Center Option “3”:

- Inclusion of landscaping and green-space to break up space.
- Small lazy river, lots of green space for youth to play.
- The zero entrance and the slides are easily visible simultaneously for parents with kids using each section.
- Some concern about traffic from aquatic center.

Evansville West Side Park and Leonard-Leota Park Improvements

Summary of Public Comment | November 17, 2021

Summary of Comments for Leonard-Leota Park Splash Pad:

- Splash pad designs seem similar.
- Like the extra green space on the Splash pad and playground area.
- Nice sized splash pad (I loved Palmer Park when the kids were little and this is what I envision)
- Option C - The splash pad is closer to the rest of the park & integrates it into the park better. 2.) The tiered design of the splash pad in C takes advantage of the sloped site, could look more "natural" to blend with the beauty of the rest of the park.
- I think that the current plan could be scaled back tremendously and save quite a bit of money.

Evansville West Side Park and Leonard-Leota Park Improvements

Project Process Report | December 13, 2021

What's New?

A Public Comment period was held through November 14th. Responses identified a number of proposed ideas and changes to the initial concepts to fit the needs of project stakeholders better. A total of 182 comments were received – via the Survey Form or direct emails. Primary takeaways from community feedback:

- West Side Park - Concepts did not include the proper mix of athletic fields – the field layout shown is not sustainable for soccer in Evansville.
- Aquatic Center - Option 3 was preferred, emphasizing open water play and the lap pool.
- Leonard-Leota Park - Option C was preferred. The splash pad is closer to the rest of the park (elevation) & integrates it into the park better. The tiered design of the splash pad in C takes advantage of the sloped site, could look more "natural" to blend with the beauty of the rest of the park.
- Future project communication should discuss accessibility, the general character of the park(s), landscaping.

The Design Team (MSA, WTI, and Rettler) developed updated concepts to address the feedback received from the community as well as the City's project team.

West Side Park - The revised concept shows two full-sized soccer fields, a 300-ft ballfield and a 200-ft softball field. An additional backstop is provided for practice and recreation play. A second 200-ft field was omitted from the concept to maintain additional unprogrammed open space and equity in the dispersion of resources between baseball/softball and soccer. A different concept was developed that shows an updated view of the referendum plan, note due to spatial constraints, sizes of the fields were reduced in this concept.

Aquatic Center – Option 3 was updated to show alternate arrangements of the diving well and lap pool to develop flexibility in lap swim and pool availability. Overall site modifications included a revision to the landscape areas and site amenities.

Work is ongoing for design at Leonard-Leota Park. An updated plan will be provided in the January update. The next stages of design will begin to refine the current proposed construction estimates and identify possible phasing of the overall master plan designs.
